ADD HEATED SEATS*

ADD HEAT TO BOTH FRONT SEATS DRIVER ONLY

*Some vehicles are equipped with pressure tape style occupancy sensors in the passenger seat that prevents the installation of a heating element in the lower passenger seat cushion. Please contact your Autoplex representative for details prior to submitting your order if this is a concern. Placement of heated seat switches are discretionary to the installer and cannot be placed in factory knock-outs.

By signing this form, I acknowledge that all leather orders are final. Leather kits can NOT be modified, returned or exchanged once this form has been submitted. I also acknowledge that the vehicle has to be driven off-site for installation of leather.
